Kata pengantar edisi revisi 2018

Edisi ini tidak banyak berbeda dari edisi 1991. Beberapa kesalahan ketik diperbaiki, satu dua kata ditambahkan sebagai penjelasan atau diganti, dan beberapa teka-teki yang dianggap kurang sopan atau kurang memadai dikeluarkan, sehingga jumlah total menjadi genap seratus.

Ejaan Muna disesuaikan dengan ejaan yang sekarang lazim dipakai. Jadi, kata depan seperti *bhee, nee, wee* dan *tee* dalam edisi 1991, semuanya ditulis *bhe, ne, we* dan *te*.

PENDAHULUAN

Dalam buku kecil ini terdapat sejumlah teka-teki Muna dalam bahasa daerah Muna. Tujuannya adalah supaya teka-teka ini dan Bahasa Muna jangan terlupakan. Walaupun dalam bentuk sederhana, kiranya buku ini bisa mengambil bagian dalam usaha pelestarian bahasa dan kebudayaan daerah Muna.

Perlu dicatat bahwa ejaan Bahasa Muna yang dipakai di sini adalah ejaan sementara. Walaupun sudah ada mufakat tentang pelambangan bunyi-bunyi khusus bahasa Muna, masih perlu pembakuan lebih lanjut.

Agar mudah dipahami oleh orang Muna yang tidak atau belum paham Bahasa Muna ataupun pendatang dari daerah lain, maka teka-teka ini disajikan dengan terjemahan dalam Bahasa Indonesia. Untuk meningkatkan pengetahuan Bahasa Inggris, maupun untuk orang dari luar negeri yang berminat, maka diberikan sekaligus terjemahan dalam Bahasa Inggris. Sebenarnya hal menerjemahkan teka-teki tidak gampang. Kadang-kadang para penulis susah mencari kata-kata yang cocok dalam Bahasa Indonesia (misalnya alat-alat tenun seperti *gisi* atau *puale*).

Karena kebudayaan Muna sangat berbeda dengan kebudayaan barat umumnya dan Inggris khususnya, maka kadang-kadang diberikan penjelasan sedikit tentang makna teka-teka yang disajikan dalam Bahasa Inggris.

Tujuh puluh teka-teki pertama disusun oleh Drs. La Mokui, yang juga menulis kata pengantarya. Teka-teki lainnya disusun oleh Drs. La Kimi Batoa dan tentu masih ada banyak yang tidak ditulis di sini. Kami juga mengucapkan terima kasih kepada Drs. La Ode Sidu Marafad M.S., Lukas Atakasi dan David Matti atas bantuan dalam penjelasan dan pengoreksian naskah.

Kami berharap bahwa buku kecil ini bisa bermanfaat bagi semua penggemar teka-teki dan khususnya bagi penutur bahasa daerah Muna. Sebagaimana karya manusia, terbitan ini juga tidak luput dari kesalahan-kesalahan. Ketidaksempumaan yang ditemui kiranya diberitahukan kepada para penulis ataupun kepada penyunting. Atas bantuan itu kami ucapkan terima kasih.

TEKA-TEKI MUNA

Kata pengantar

Apa yang disebut teka-teki, dapat dikatakan diketahui pada berbagai kampung dalam daerah Kabupaten Muna. Sebab pada berbagai kampung selalu ada orang yang pandai berteka-teki. Karenanya dapat dikatakan bahwa teka-teki telah berakar dalam daerah Muna.

Teka-teki ini sangat digemari oleh anak-anak, para gadis, para pemudi dan juga orang tua. Digemari karena menggembirakan dan juga dapat mengasah otak dan pemikiran. Selain itu mungkin dapat memulihkan rasa lelah. Pada siang hari lelah bekerja di kebun, pada malam hari istirahat kemudian mengadakan acara teka-teki.

Terkadang sesudah makan malam, anak-anak, para pemuda, para gadis dan para orang tua, berkumpul pada salah sebuah rumah orang pandai cerita dan teka-teki. Setelah mereka terkumpul dalam jumlah yang banyak, mereka membentuk kelompok perlawanan, wanita bersama-sama demikian pula pria. Selesai acara teka-teki diselingi dengan cerita-cerita yang mengandung nasihat atau budi pekerti.

Baik teka-teki maupun cerita-cerita pendek, sekali-sekali diiringi dengan gelak tawa. Tawa ini tentu disebabkan mereka gembira. Betapa tidak gembira, hal itu mengasyikkan dan menyenangkan. Lebih-lebih bila berteka-teki ada yang kalah. Pemenang gembira karena mendapatkan nilai, sedangkan yang kalah merasa lucu karena salah menjawab.

Manakala berteka-teki antara kelompok gadis dengan kelompok pemuda, para orang tua mendengarkan, berfungsi sebagai penengah apabila ada pertengkarannya atau salah paham.

Dalam berteka-teki sering yang memulai adalah kelompok wanita, para pemuda menjawab teka-teki yang disampaikan. Kalau mereka tidak tahu jawabnya, mereka menyatakan, "Kami telah berutang satu; sekarang giliran kami untuk berteka-teki." Setelah menyampaikan teka-teki, kelompok wanita menjawab juga. Demikianlah mereka silih berganti berteka-teki sampai mengantuk. Selesai berteka-teki mereka menghitung kemenangan dan utang masing-masing pihak. Kelompok yang terbanyak menjawab tidak benar, dinyatakan kalah. Kekalahan dapat ditebus pada kesokan malamnya lagi. Selesai menghitung jumlah salah ataupun jumlah benar, pemilik rumah dan mereka yang bermalam di rumah itu tidurlah. Selainnya kembali ke rumah masing-masing untuk tidur juga.

Keesokan malamnya, mereka mengadakan acara teka-teka lagi sebagaimana biasa. Tetapi tidak selamanya menetap pada sebuah rumah, terserah dari kesepakatan.

Teka-teki dan cerita pendek ini disambut dengan antusias oleh para pemudi dan pemuda. Menjadi penghibur hati pada zaman dahulu.

Sebahagian dari teka-teki mereka adalah sebagaimana tulisan berikut ini.

MUNA RIDDLES

Introduction

It can be said that riddles are known all over Muna because in every village there will always be someone who knows riddles. It can therefore be said that telling riddles has taken root in Muna.

Riddles are enjoyed by children, teenage boys and girls, as well as by older folk. They are enjoyed because they create a cheerful atmosphere and because they also sharpen one's mind. Sometimes it seems riddles can also relieve exhaustion. During the day people work hard in the fields; in the evening they rest at home asking riddles.

Often after the evening meal, children, teenage boys and girls and older people will gather at the house of an old man who is good at telling stories and asking riddles. When many people have gathered, teams are formed: the women together and the men together. In between the riddle telling, stories are told with a moral message or exemplifying a character trait.

Both riddles and stories are often accompanied by bursts of laughter. Laughter, of course, because people are happy. And that is hardly surprising, as the atmosphere is cheerful. All the more so when people are losing. The winner is happy because he is scoring points; the loser feels funny because he is giving the wrong answers.

When riddle asking takes place between teams of teenage boys and girls, older people listen in and function as referees when there is some controversy.

In asking riddles it is frequently the girls who begin asking; the boys answer that riddle. When they don't know the answer they say, "One debt-point for us; now it's our turn to ask." Then the girls must answer. In this way they continue taking turns until they all get sleepy. Afterwards they count the number of right and wrong answers of each side. Those who have the biggest number of wrong answers have lost. Their loss can be compensated for in another game the following evening. After counting right and wrong answers, the house owner and those who live there go to bed. The others go to their own homes to sleep too.

The following evening they tell riddles again like the day before. But not necessarily in the same house; it depends on what is agreed upon.

Riddles and folk stories were enthusiastically received by teenage boys and girls. This was the entertainment of the old days.

A number of these riddles have been written down below.
